

EUROBONUS MEMBERS ARE ONE SUSTAINABLE STEP AHEAD

Effective **1 February**, SAS is going to offset the flight carbon footprint of **all tickets** booked using a **EuroBonus** number.

By including carbon offset for its EuroBonus program members, **40%** of SAS's passenger-related carbon dioxide emissions will be offset.

SAS already offsets all **youth tickets** and **own business travel** within the company.

The SAS logo is displayed in a bold, blue, italicized sans-serif font. It is positioned in the lower center of the image, overlapping the cobblestone path and the street. The background of the entire image is a scenic view of a coastal town at sunset, with a stone wall on the left, a paved street with a car, and a harbor with boats on the right. The sun is low on the horizon, creating a warm, golden glow and long shadows.
